To: Princes Risborough School, All Students, Parents & Carers

Ref: Power Failure & 3G Pitch Update

Dear Students, Parents and Carers,

Following my previous communications regarding the power failure at our school, I am writing to provide a final update.

I am delighted to confirm that full power has been restored, and a permanent, sustainable solution has been implemented to future proof the areas affected. The school is now operating as usual.

As previously mentioned, because of these critical works our plans for the new 3G Pitch and MUGA build have been temporarily postponed. I am in discussions with our main funder, and the wider project team, we are all hoping for a revised start date of Monday 29th June, with an estimated completion date in November.

The start date is subject to the discharge of the remaining pre-commencement conditions by Bucks Planning Department and funding approval within the new timelines, both of which I am confident will be achieved.

For our GCSE and A level students, this also means that all construction work will begin after exams.

Thanks to everyone who has supported and worked with us to ensure a smooth and successful completion of restoring power. I will continue to update you on the 3G Pitch and MUGA progress as soon as I receive more information.

Yours sincerely

Jemma Arnold-Gunning
